

## FERROSHEET™

### Magnetic Receptive Media

**FERROSHEET** from Flexmag is a magnetic receptive media that can be used in conjunction with magnetic sheeting to create easily removable signs, banners, and other promotional and interactive pieces. It can have a paper or vinyl laminated to it which can be printed on in most printers and then attached to a magnetic sheet mounted on a wall or stand. **FERROSHEET** is also available with indoor or outdoor adhesive which allows it to be easily mounted to a wall or stand as a base receptor for a graphic printed on magnetic media. Both combinations allow for a cost effective way to quickly and easily change signs, banners, POP displays, menu boards, and other advertising applications.
