

# Energize

Standard energy unmagnetized substrate for offset and digital printing  
 White back – available in 13 pt and 17 pt - requires magnetizer

**Energize** your project with a strong magnetic message that your clients will put on their refrigerator or filing cabinet and will see every day. A printed magnet will keep your message in front of your potential customers instead of being trashed or stashed away in a drawer. **NOTE: Energize** must be magnetized after printing.

Flexmag's **Energize** substrate has a premium coated offset paper print surface on a standard energy magnetic sheet. It will feed and print beautifully on most offset and digital presses\*.

Since it has a white back, you do not have to shut off your optical sheet detectors, and it does not have to be slip sheeted. The white back also gives the visual impact of superior quality to your finished piece.

**Suggested Applications:** Coupons, Direct Mail, Calendars, Business Cards, Indoor Advertising, Promotions, Reminders, Take Out Menus, POP Signage

Item #	XXXXX-5	XXXXX-5
Caliper	.013"	.017"
Sheet Size	12 x 18"	12 x 18"
