

## **FLEXMAG™ ...** *a choice you can feel good about.*

### **ENVIROmag™**

#### ***powerfully attractive to the planet***

ENVIROmag™, the newest creation from FLEXMAG™, is missing something. It has the same look and feel as our standard sheeting. It has the same magnetic strength and physical properties, and the same expedient delivery time and guarantees. **What it does not have: halogen.**

Halogen-free ENVIROmag™ allows you to offer your clients around the globe an environmentally-friendly choice. Halogen creates dioxins when burned. Without this ingredient, ENVIROmag™ sheeting is safe for incineration. This means cleaner air and no more contributions to landfills. And ENVIROmag™ can also be supplied with halogen-free laminates.

### **sideMAG™**

#### ***on the cutting edge of trade show graphics***

Your company's trade show presence has to be polished, professional and attractive. But assembling large graphic elements that are often part of your display booth can be a challenge. Traditional joining materials create gaps, overlaps and lumps that detract from your message and diminish your company's credibility.

Now FLEXMAG™ brings you a cutting edge solution: *sideMAG™*, a thin, flexible magnetic stripping that brings all your trade show graphics together—seamlessly. Easy to use, *sideMAG™* is also the most affordable and durable joining product on the market.

### **ULTRA-MAG™**

#### ***powerful magnetic sheeting, strips and custom extrusions***

Your projects will weather the elements beautifully with this ingenious product! ULTRA-MAG™ sheeting is a thermoplastic permanent magnet material with a multi-magnetic polarization designed to produce greater holding force on magnetically receptive surfaces. ULTRA-MAG™ sheeting is laminated with a variety of coatings, applied with a strong acrylic adhesive for excellent outdoor weatherability.

### **thinmag®**

#### ***flexible, economical, powerful***

Save money without sacrificing quality, power or printability! thinmag®'s amazingly smooth printing surface surpasses the printing surfaces of any magnetic sheeting of any thickness you can find anywhere. thinmag® also gives you excellent stability and durability. It comes in a wide array of colors, widths and any length you need. And it's easily diecut!

### **FERROSHEET™**

#### ***engineered to attract magnetic materials***

If you or your client rely on frequently changed visual displays to communicate your message, you will appreciate the ease at which FERROSHEET™ allows you to make changes. Attach FERROSHEET™ to any smooth surface and flexible magnets can now be applied without the pole alignment challenge caused by magnet to magnet attraction.

### **SafeMag**

#### ***back coated flexible magnetic sheet***

You will appreciate the special backcoating used in this flexible magnetic sheeting which acts as a safe barrier between the magnetic surface and the surface to which it is applied. SafeMag™ is perfect for applications like vehicle signs. This backcoating is equally important where "blocking" is a problem when printed magnetics need to be stacked during the printing process.
